Contents

Preface ix

Factors influencing the FLD of automotive sheet metal 1
D.W.A. Rees

Role of copper in iron–iron boride cermets 9
J. Nowacki

Numerical models of in-service welding of gas pipelines 14
P.N. Sabapathy, M.A. Wahab, M.J. Painter

Reciprocating surface grinding of a gamma titanium aluminide intermetallic alloy 22
S.A. Bentley, N.P. Goh, D.K. Aspinwall

Tool life when high speed ball nose end milling Inconel 718™ 29
A. Sharman, R.C. Dewes, D.K. Aspinwall

Extremely low cycle (ELC) fatigue cracking behaviour in steel bridge rigid frame piers 36
M. Sakano, M.A. Wahab

Material property changes associated with laser forming of mild steel components 40
G. Thomson, M. Pridham

Fatigue properties of the refurbished INCO-617 alloy 45
M. Kewther Ali, M.S.J. Hashmi, B.S. Yilbas

Thermal stresses in thick-walled pipes subjected to fully developed laminar flow 50
I.T. Alzaharnah, M.S. Hashmi, B. Yilbas

Automobile leaf springs from composite materials 58
H.A. Al-Qureshi

A note on the corrosion characterisation of ZA-27/zircon particulate composites in acidic medium 62
S.C. Sharma, D.R. Somashekar, B.M. Satish

Wear characteristics of phosphor–bronze/silicon carbide particulate composites 65
S.C. Sharma, B.M. Satish, B.M. Girish, D.R. Somashekar

Study on wear properties of aluminium–silicon piston alloy 69
M.M. Haque, A. Sharif

Development of crack-free welds in a TiAl-based alloy 74
M.C. Chaturvedi, Q. Xu, N.L. Richards

Diffusion in the intermetallic compound CoGa 79
I.V. Belova, G.E. Murch

Diffusion in nickel-based intermetallic compounds taking the $L1_2$ structure 82
G.E. Murch, I.V. Belova

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.

CONTENTS Direct

This journal is part of **ContentsDirect**, the ***free*** alerting service which sends tables of contents by e-mail for Elsevier Science books and journals. You can register for **ContentsDirect** online at: **www.elsevier.com/locate/contentsdirect**

Elsevier Science B.V.

Microwave joining of 48% alumina–32% zirconia–20% silica ceramics 88
A. Ahmed, E. Siores

Analysis of stiffness of adhesive joints in car bodies 96
A. Beevers, S.M. Steidler, J. Durodola, M. Coackley

Friction law for hydrostatic mixed lubrication regime 102
E. Vidal-Sallé, L. Baillet, J.C. Boyer

Development of a hybrid neural network system for prediction of process parameters in injection moulding 110
P.K.D.V. Yarlagadda, C.A. Teck Khong

Experimental study of corrosion fatigue behaviour of welded steel structures 117
M.A. Wahab, M. Sakano

Effect of process variables on microstructure and segregation in centrifugal casting of C92200 alloy 123
A. Halvaee, A. Talebi

Characterization of the GTAW fusion line phases for superferritic stainless steel weldments 128
A.H. ElSawy

Linkage between quality assurance tools and machinability criteria 133
S. Dolinšek, J. Kopač

Rapid determination of the optimum frequency band and temperature profile using fully computerised VFM oven 138
B. Soesatyo, E. Siores, A.S. Blicblau

Surface integrity of a high speed milled gamma titanium aluminide 143
A.L. Mantle, D.K. Aspinwall

Cinematics and volume deformations during roll-press briquetting 151
Yu.N. Loginov, S.P. Bourkine, N.A. Babailov

Realistic modelling of earthquake-isolation bearings 158
S. Jerrams, K. Sanders, K.B. Goo

Roll casting of aluminum alloy strip by melt drag twin roll caster 165
T. Haga, S. Suzuki

Casting of aluminum alloy ingots for thixoforming using a cooling slope 169
T. Haga, S. Suzuki

Selective laser sintering of TiC–Al_2O_3 composite with self-propagating high-temperature synthesis 173
A. Slocombe, L. Li

Characteristics of spatter formation under the effects of different laser parameters during laser drilling 179
D.K.Y. Low, L. Li, A.G. Corfe

Characterisation and tribological evaluation of a nickel surface alloyed aluminium-based material 187
M. Heydarzadeh Sohi

Metallic powder injection molding using low pressure 193
A.C. Gonçalves

Synthesis of nanostructured silica via sol–gel process with incorporation of cesium compound 199
A.M.M. Santos, F.S. Lameiras, W.L. Vasconcelos

Sliding wear prediction of ductile materials 205
Y. Blake

Production of Ti–6%Al–7%Nb alloy by powder metallurgy (P/M) 212
V.A.R. Henriques, C.E. Bellinati, C.R.M. da Silva

A technique for revealing and agreeing an agenda for process improvement 216
M. Dooner, T. Ellis, K. Swift

Phase compositions and depth-profiling of calcium aluminates in a functionally-graded alumina/calcium-hexaluminate composite 219
D. Asmi, I.M. Low, B.H. O'Connor, C. Buckley

Infiltration and physical characteristics of functionally graded alumina/calcium-hexaluminate composites 225
D. Asmi, I.M. Low

Tool life and surface integrity in turning titanium alloy 231
C.H. Che-Haron

A vision-integrated tension test for use in sheet-metal formability studies 238
K.P. Rao, E.V.R. Mohan

Structure and strain hardening of superalloy AEREX350 246
S. Asgari

Drawing of Ni–Ti shape-memory-alloy fine tubes used in medical tests 251
K. Yoshida, M. Watanabe, H. Ishikawa

Properties of rare earth oxide doped translucent polycrystalline alumina 256
J.D. Hooker, I.P. Kilbride, V. Randle

Aids to innovation in the design and manufacture of hand-held consumer products 261
S. Pace

Surface roughness prediction based on cutting parameters and tool vibrations in turning operations 269
O.B. Abouelatta, J. Mádl

Non-conventional machining of particle reinforced metal matrix composites 278
F. Müller, J. Monaghan

A finite element analysis of cold-forging dies using two- and three-dimensional models 286
C. McCormack, J. Monaghan

Modelling the orthogonal machining process using coated cemented carbide cutting tools 293
T. MacGinley, J. Monaghan

Temperature measurement in single point turning 301
D. O'Sullivan, M. Cotterell

Chemically modified glasses for analysis of hydrogen isotopes by gas-chromatography 309
V. Stanciu, D. Stefanescu, E. David

Ductile tearing energy of aluminium alloy sheets determined by the single tensile testing (STT) method 316
R. Mahmudi

Surface and image analysis of oxides grown and spalled on heat resistant cast steels exposed to thermal cycles 321
S. Baleix, S. Le Roux, G. Bernhart, P. Lours

Performance of powder filled resin-bonded diamond wheels in the vertical dry grinding of tungsten carbide 329
S.Y. Luo, Y.C. Liu, C.C. Chou, T.C. Chen

Issues in pre-clinical testing of implants 337
P.J. Prendergast, S.A. Maher

Modeling of harmonic contributions to non-symmetrical RF plasmas 343
M.N.A. Dewan, P.J. McNally, P.A.F. Herbert

Effect of deep cryogenic treatment on the mechanical properties of tool steels 350
A. Molinari, M. Pellizzari, S. Gialanella, G. Straffelini, K.H. Stiasny

A study on the hot-deformation behavior and dynamic recrystallization of Al–5 wt.%Mg alloy 356
J.R. Cho, W.B. Bae, W.J. Hwang, P. Hartley

A revolutionary style at third level education towards TQM 362
J. Prendergast, M. Saleh, K. Lynch, J. Murphy

Determination of the laws of polarization by coupling measurements with numerical tool 368
F. Druesne, P. Paumelle, P. Villon

A decision support system for sheet metal blanking process parameters selection 371
F. Faura, M.A. Sebastián, R. Zamora

Tribology of coated tools in conventional and HSC machining 377
J. Kopac, M. Sokovic, S. Dolinsek

Critical parameters influencing the quality of prototypes in fused deposition modelling 385
R. Anitha, S. Arunachalam, P. Radhakrishnan

Efficient strategies for the simulation of railway wheel forming 389
K. Davey, B.C. Miller, M.J. Ward

The influence of the thermomechanical processing and forming parameters on superplastic behaviour of the 7475 aluminium alloy 397
A. Smolej, M. Gnamuš, E. Slaček

Design and analysis of a virtual factory layout 403
M. Iqbal, M.S.J. Hashmi

Evaluation of inserts for modular thermoplastic injection moulds produced by spin casting 411
A. Gatto, L. Iuliano

Study on the deformation of die and product in closed die upsetting 417
Y.B. Park, K.H. Lee

Lead as a model material to simulate mandrel rolling of hot steel tube 422
K. Baines

Study on super-finishing by CBN stone (estimation of cutting performance using average crossing angle) 429
E. Aoyama, H. Nobe and T. Hirogaki

Drilled hole damage of small diameter drilling in printed wiring board 436
E. Aoyama, H. Nobe, T. Hirogaki

The predictive model for machinability of 304 stainless steel 442
W.-T. Chien, C.-Y. Chou

Erosion of ceramics and cermets 448
G.E. D'Errico, S. Bugliosi, D. Cuppini

Finite element analysis of melt spun yarn 454
C. Harder

Mechanical and numerical modelling of composite manufacturing processes deep-drawing and laying-up of thin pre-impregnated woven fabrics 460
A. Cherouat, J.L. Billoët

Identification of the damage parameters for anisotropic materials by inverse technique: application to an aluminium 472
F. Lauro, B. Bennani, P. Croix, J. Oudin

Evaluation of optimisation techniques in the design of composite pipelines 478
A.M. Harte, J.F. McNamara, I. Roddy

Selection of cutting conditions and tool flow in flexible manufacturing system 485
F. Čuš, J. Balič
